

RESIN CONVERT-A-BENCH

For customer service call 1-800-508-2253

Parts List

- A. 4 – Large Planks (2 x 6)
- B. 2 – Small Planks (2 x 4)
- C. 1 – Small Plank (2 x 4) – with pre-drilled holes
- D. 2 – Arms (Left & Right)
- E. 1 – Support Brace
- F. 2 – Legs (Left & Right)

Hardware Pack :

2 Hinge pins & 4- 2 1/4 inch bolts with locking nylon nuts.

Due to the manufacturing process you want to clean off each part before assembly.

Assembly Instructions

1. Start assembly of bench bottom by inserting planking into the slots of one leg (F). Use 2 large planks (A) in the outside slots and 1 small plank (B) into the middle slot. (Do not use small plank with pre-drilled holes).
2. Next insert small planking with drilled holes (C) into middle slot of bottom part of leg (F).
3. Attach other leg (F) into the planking. Make sure planking is completely inserted into all leg slots. Sit bench upright.
4. Assemble the bench back by inserting the planking in the arms (D). Use 2 large planks (A) on the outside slots and 1 small plank (B) in the middle slot. Insert 3 planks into one arm and then slide the other arm on the planks. Make sure that each plank is completely inserted into each arm slot.
5. Attach bench back to bench bottom by aligning the slot at the bottom front of the arm with the knuckle on the top of the leg. (this makes up the hinge of the bench). Make sure the bottom of the arm touches the top of the bench bottom. After these are aligned, insert the plastic hinge pin through the hole of the hinge.
6. Line up pre-drilled 2 x 4 plank holes with the leg pre-drilled holes. Now place two bolts on each leg thru the 2 x 4 plank. This might require a small hammer to tap the bolts into place to insure a good tight fit. Attach locking nylon nut that needs to be securely tightened. (Do Not over tighten).
7. Insert the support brace (E) onto the small planking (C) under seat of bench. The seat of the bench will sit on the long part of the support. The smaller end of the support will slide in the small 2 x 4 pre-drilled plank. (Center this in the middle of bench).

Clean your Convert-A-Bench by using a mild detergent or all purpose spray cleaner and water. For better care, the Convert-A-Bench should be covered during the off season and kept out of the weather whenever possible

TO AVOID DAMAGE, DO NOT DROP OR MISUSE THIS PRODUCT WHICH WILL VOID WARRANTY.

CAUTION: SUPERVISION IS NECESSARY WHEN CONVERTING THE BENCH INTO A TABLE DUE TO POTENTIAL INJURY

Note: Hinge knuckle determines front of bench
